

Terry & Molly:

Rich Hollander asked me to drop a line to tell you how our log home is progressing.

Harriet and myself are planning to retire to So. VT next year and keep an apartment in NYC for fun and visiting the kids and grandkids who live in the area. We have a nice lot on East Road in Bennington near the Shaftsbury line.

After about 3 years of looking at modular and log packages we decided on Kuhns based on the value for the money and the finished look. They have thought of every detail and the finished product is miles ahead of any other package on the market. We are looking at our house as retirees with lot of fun things to do - not to look after a piece of real estate. We expect to be warm in winter.

Both Rich and Jay have guided us through the process, which to date, has been completely painless. Things were done on schedule and everything was within or below budget. So far we have had NO surprises or unexpected crisis. All the horror stories you hear about just have not happened with these 2 professionals on our side. Kuhns design phase was particularly impressive.

Our home is about 1800 square feet and we plan to fill it with kids and grandkids on Thanksgiving.

If you have any questions, please drop me an email or call me in the evening at 212-593-0946.

Len Levine
